MOHAMMED SHADAB

itskmshadab@gmail.com | | LinkedIn | GitHub

SKILLS

Programming Languages:	C++, C, Java, Python, JavaScript, TypeScript, C#
Libraries/Frameworks:	Node.js, Bootstrap, React, pandas, Selenium, LangChain
Tools / Platforms:	Git, VS Code, Postman, Linux, Firebase, Azure, Docker, Kubernetes, Jenkins
Databases:	SQL (MySQL/PostgreSQL), MongoDB

PROJECTS

AI-Proctored Exam Solution *(manuscript in preparation for IEEE submission)* *Java, Android SDK, ML Kit, Firebase, CameraX*

- Engineered an edge-AI proctoring pipeline with ML Kit BlazeFace and CameraX for real-time gaze, head-pose, and RMS audio tracking at **22 fps** with sub-120ms inference latency.
- Designed an ultrasonic proximity engine (20–30 kHz FFT) and keystroke-variance analyzer that flag collusion and scripted input, reducing missed-detection rate by **35%**.
- Enforced OS-level lockdown through Android Kiosk Mode (`startLockTask`), `FLAG_SECURE`, and clipboard sanitization to eliminate common cheating vectors during live exams.
- Built a `MatrixCursor` bridge binding asynchronous Firebase Realtime DB streams to native UI adapters, cutting UI refresh latency by **45%**.

Sentiment-Driven Quantitative Trading Framework *(WIP)* *Python, NLP, Pandas, Scikit-learn, Groww API*

- Developed an NLP sentiment pipeline that scrapes timestamped HNI, institutional, and analyst commentary, converting unstructured text into entity-level polarity scores fed directly into trade-signal generation.
- Architected a high-throughput backtesting harness screening **100+** quantitative strategies (momentum, mean-reversion, sentiment-arbitrage) against Sharpe, Sortino, and drawdown scorecards, stress-tested across geopolitical/macro shock regimes with slippage-latency modeling.
- Orchestrated live execution via the Groww API using asynchronous, event-driven order routing, volatility-adjusted position sizing, and portfolio-level risk circuit breakers.

VoicePay *(Amazon HackOn 5)* | Link *TypeScript, Node.js, Firebase, GitHub Actions*

- Delivered a multilingual, voice-first UPI payment SDK for mobile and IVR systems using TypeScript and Firebase, improving accessibility for visually impaired and non-technical users.
- Configured CI/CD workflows with GitHub Actions for testing, linting, and Firebase deployment, cutting release iteration time by **35%** during the hackathon.

EXPERIENCE

Volvo Group | DevOps Intern Bengaluru | May 2026 – Jul 2026

- Implemented an AI-powered test-automation framework using Python and Robot Framework, accelerating continuous deployment within Azure Pipelines by **30%**.
- Maintained GitHub CI/CD workflows to accelerate regression testing, cloud environment validation, and legacy-to-modern architecture migration.
- Applied GenAI APIs to build secure DevOps utilities for AI-assisted test case generation, defect triaging, and high-availability consistency checks.
- Documented pipeline architecture and best practices, cutting new-intern onboarding time by **25%**.

MadTales.AI | AI/ML Intern Manipal | 2025

- Devised a CNN-based pipeline for PDF line classification (Keep / Remove / Review), cutting manual document-review time by **60%**.
- Deployed the model to mobile via Flutter with TensorFlow Lite, including tokenizer migration and a real-time classification UI; explored hybrid CNN–Transformer models for improved semantic precision.
- Benchmarked classifier performance at **92%** validation accuracy across **5,000+** labeled PDF lines, iterating alongside a 4-person ML team.

Astronomy Club | Treasurer Manipal | 2025 – 2026

- Administered a budget exceeding **Rs. 50,000**, securing sponsorships and optimizing allocations to support 15+ academic and outreach events.
- Supervised logistics and finances for workshops, lectures, and stargazing sessions (**100–500** attendees), driving engagement growth of **25%**.
- Negotiated sponsorships with **8+** local vendors and alumni donors, growing the annual club budget by **20%** year-over-year.

EDUCATION

Manipal Institute of Technology, Manipal *2023 – 2027*
B.Tech, Computer and Communication Engineering (CCE) *CGPA: 7.29*

Narayana PU College, Bengaluru *2020 – 2023*
Class 12 (PUC) *Percentage: 70.4%*

Cambridge School, Bengaluru *2010 – 2021*
Class 10 *Percentage: 91.5%*

HONORS, AWARDS & CERTIFICATIONS

- Runner-up – Gen AI Hackathon by Google-backed Slang Labs; built a legal-tech AI solution.
- Qualified for Smart India Hackathon (SIH) College Round in two consecutive years with working engineering prototypes.
- 4th Place – Ops Essentia Case Study by IIM; ranked among top non-MBA teams.
- Finalist – Amazon HackOn Season 5; shortlisted from **60,000+** participants for prototype round.
- **Level 1 IRM Certification** – International Risk Management Institute, Inc. (IRMI).
- **Google AI** – Google; **Marketing in a Digital World** – University of Illinois Urbana-Champaign.
- Runner-up – Drone Challenge, Tech Summit 2019; awarded **Rs. 15,000** by Deputy CM.
